John, please see my summary.

Under Phase 2 Mobilization 1, we will be able to complete the soil investigation for both process areas and the eastern portion of the East Tank Farm. This would include an estimated 117 locations and an estimated 605 soil samples. Combined with the funding already received, we may also be able to complete delineation of the east tank farm berms and potentially move into either the Loading dock area or the North Tank Farm.

Completing tank delineation within the East Tank farm may provide us with enough information to support an early action to address contamination within residential properties.

Subject: Additional pipeline funds

Katrina, Mike,

Can you send me a short statement of what you could do if you received additional \$290K in pipeline funds this FY. Pam wants to make the final decision on who gets the funds. I was thinking Wilcox and Evr-Wood.
